Water volume: 1300 litre

Empty weight: 340 kg

# Augusta

The Augusta is large enough for the whole family and at the same time compact enough to fit in almost any (roof) garden or terrace.

The characteristic barrier free and modern design provides plenty of room to move about and is therefore also suitable for children. The sitting positions have different levels so that there is always a place that is just right for your length. Augusta is available in two different versions, with different numbers of massage jets – Augusta 20 (23 jets) and Augusta 40 (41 jets). Luxury for young and old, any time of day, the whole year through.
