# Savannah

The Savannah is a compact spa with a very efficient layout. Thanks in part to its low height, this spa is easy to place on your balcony or roof terrace. You can choose to sit next to one another or across from one another in the spa. The spacious reclining position is equipped with a relaxing leg and foot massage. In short, the Savannah is a spa that caters to all of your wishes and in which you can relax and recharge. During the cold winter months, the warm water relaxes your muscles and joints while you breathe in the fresh outdoor air.

**4SeasonsSpa**

On the backside you will find further specifications of the Savannah and a description of the available options. More information can be found on [www.4seasonsspa.com](http://www.4seasonsspa.com).
