Empty weight: 430 kg

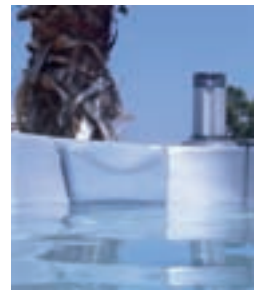

Flora

The Flora is the most spacious model of the 4SeasonsSpa series and is currently one of the largest spas available anywhere. The sitting positions are extra deep, making it very comfortable for people with a larger build. The large number of jets lets you enjoy an extensive massage. Attention was even given to the palms and wrists. The design of the Flora is barrier free and modern. Relaxing after work or a workout and always ready for use.

4SeasonsSpa

On the backside you will find further specifications of the Flora and a description of the available options. More information can be found on www.4seasonsspa.com.
